

Foundation Installation

- Footings are required where existing substrate isn't available
- Decking, paving slabs or block paving will not require footings
- Locations on soft landscape will need a solid foundation, this is to ensure the pod can be anchored down sufficiently
- Dimensions of 4 person foundation: 1850mm Width x 1540mm Depth x 150mm Thickness
- Excavate landscape down a minimum of 150mm Depth, oversize the dimensions and back fill after concrete has been poured
- Place shuttered box inside hole ensuring the top of timber frame is level to the highest point of landscape
- Internal shutter box dimensions to match drawing dimensions
- Fill with concrete and float finish level and smooth
- Minor leveling can be achieved with pod leveling feet
- 0.44 M3 concrete required
