

# Container Booth

Form. Function. Edge.

# Industrial Elegance, Refined.

Introducing the Container Booth, a signature piece within our Edge Collection, where bold industrial character meets elevated craftsmanship.

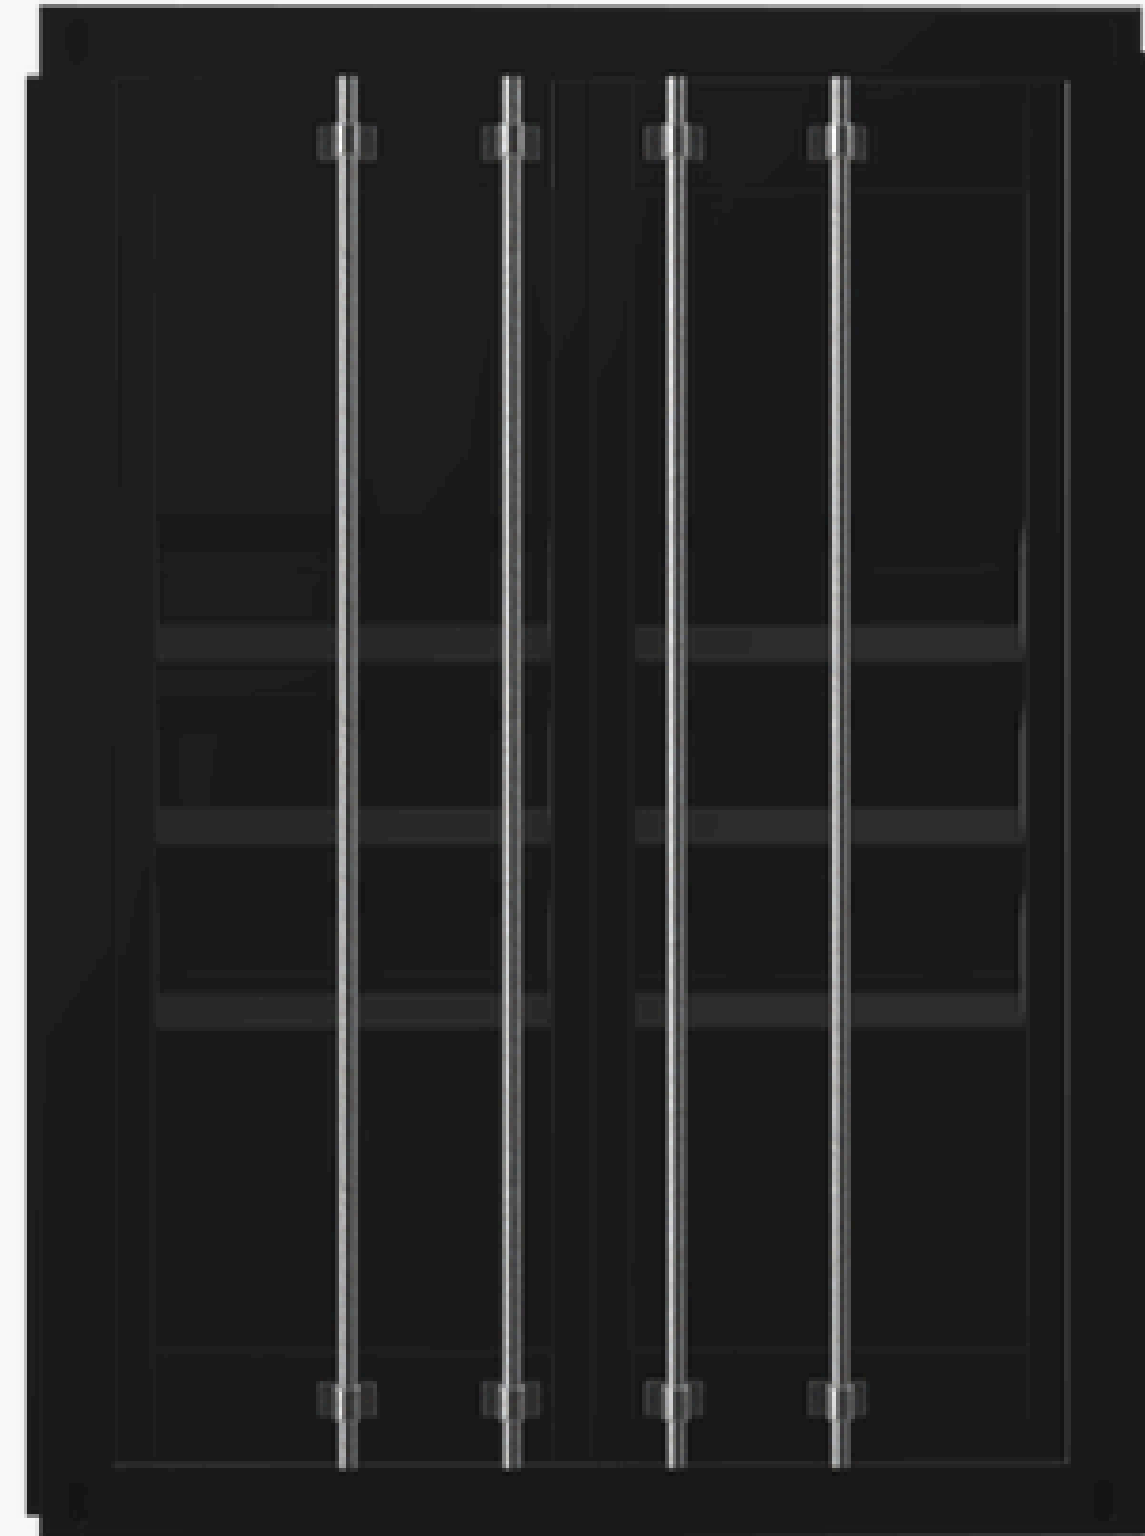

Designed for up to 4 users, this fully enclosed pod captures the timeless appeal of a shipping container while delivering exceptional acoustic performance, refined detailing, and a premium interior experience.

The Container Booth stands as a sculptural, high-impact workspace that transforms any office environment with its sophisticated presence and uncompromising functionality.

# Where Maritime Heritage Shapes Modern Design

The design of the Container Booth began with a simple but powerful observation: our home on the Isle of Wight sits beside one of the busiest shipping channels in the world. Every day, vast container ships pass by. Symbols of scale, structure, and purposeful engineering. This constant maritime backdrop sparked the idea to reinterpret the iconic shipping container as a premium workspace.

Drawing on this industrial heritage, our design team transformed the raw, functional aesthetics of a container into something refined and architectural. The result is a pod with bold lines, precision detailing, and a confident presence that echoes the strength of its inspiration while elevating it for the modern office. Within the Edge Collection, the Container Booth stands as a testament to how place, craft, and storytelling can shape exceptional design.

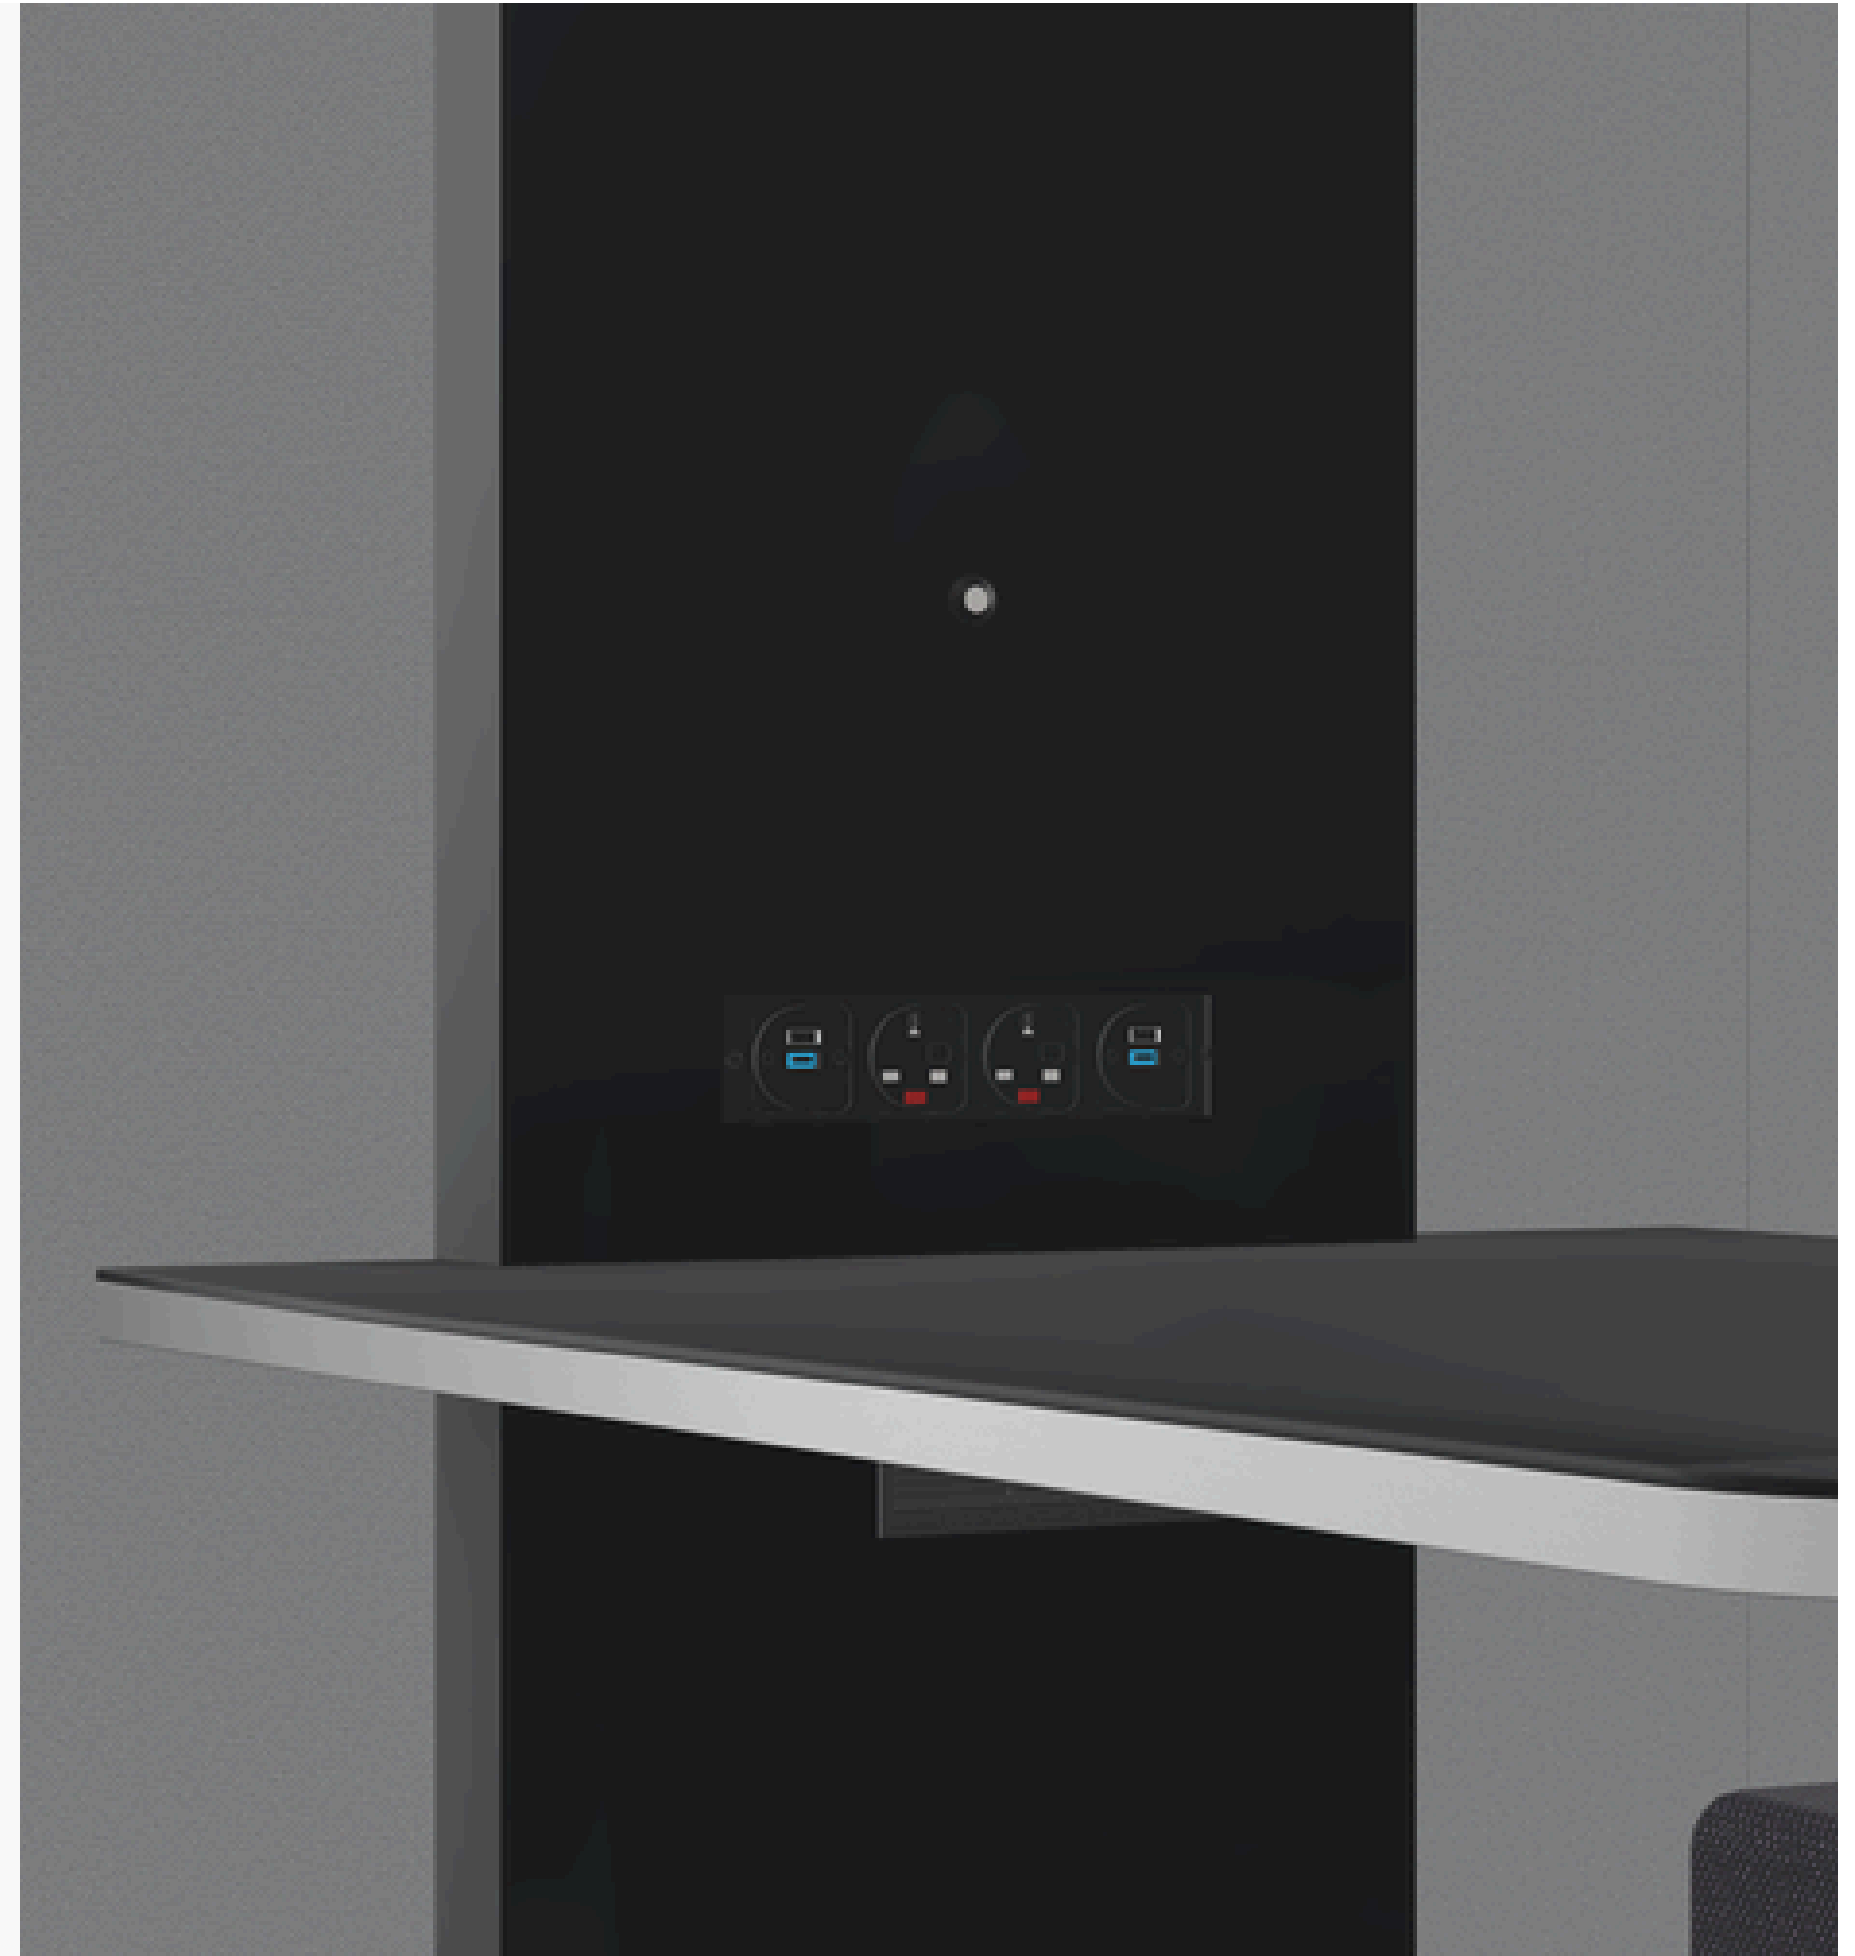

# Stay Connected. Stay Powered.

The Container Booth comes equipped with the OE Electrics Powerunit, delivering dependable, high-performance connectivity as standard. Each booth includes **two UK 3-pin sockets, two USB ports, and two USB-C ports**, ensuring effortless charging for all modern devices, whether you're collaborating, presenting, or working privately.

Crafted with the same attention to quality that defines our Edge Collection, the Powerunit is backed by OE Electrics' **10-year warranty**, offering long-term confidence and exceptional durability. It's power you can trust, built into a workspace designed to empower every moment inside.

**Maximum usage - 1,200 watt**

# A Brighter Way To Work

The Container Booth is illuminated by **two recessed LED strip lights**, seamlessly integrated into the ceiling for a clean, architectural finish. **Activated by a discreet PIR sensor**, the lighting responds instantly to occupancy, creating a welcoming, energy-efficient glow the moment you step inside.

Balanced, comfortable, and crafted to enhance focus, our lighting design elevates the premium interior of the Edge Collection while ensuring a consistently bright and inviting workspace.

Colour temperature **4000K**

# Sit Better. Work Better.

The Container Booth features our **new bench-style seating** system designed to elevate comfort, longevity, and visual cohesion. The integrated backrest is built directly into the wall panel, creating a seamless architectural finish that enhances the booth's premium interior aesthetic.

**Upholstered in high-performance task fabric**, the seating is crafted to withstand the demands of daily use, offering exceptional durability and reduced wear and tear. The result is a refined, resilient seating solution that supports productive meetings and focused work.

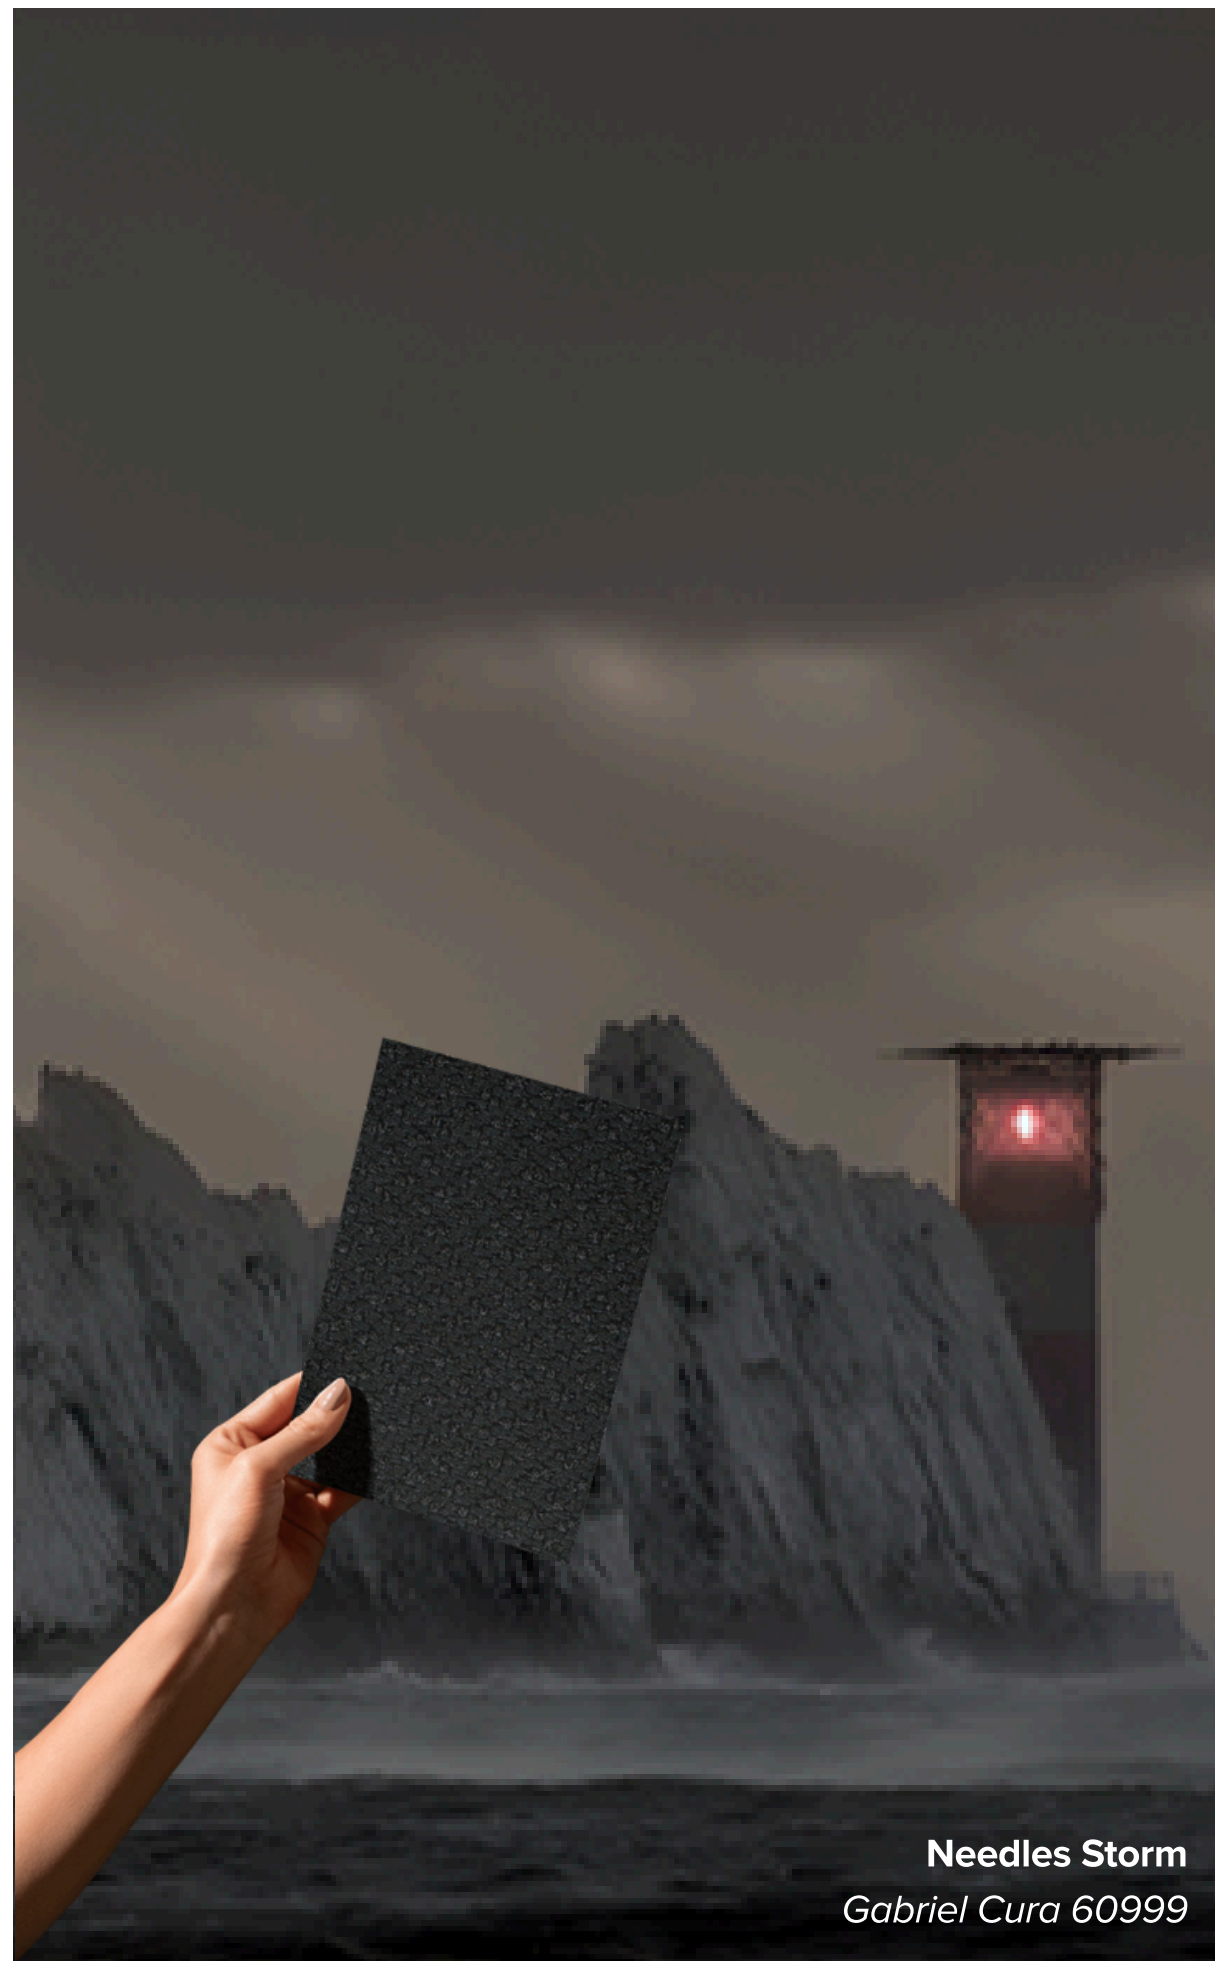

# Custom Comfort. Island Inspired.

The Container Booth offers **three carefully curated fabric colour options as standard**, each inspired by the nautical tones that define the Isle of Wight's coastline. These colours bring a subtle connection to our maritime surroundings, blending place, heritage, and design into every booth.

Both the seating and the ceiling are upholstered in Gabriel Cura, a high-performance task fabric engineered for heavy, everyday use. Known for its durability, refined texture, and long-lasting appearance, Cura ensures the Container Booth remains as resilient as it is beautiful.

# Fresh Air That Fuels Focus.

Our **dual-fan ventilation system** activates automatically via a **PIR sensor**, ensuring a continuous flow of clean, fresh air without disrupting the booth's quiet environment.

One fan draws in fresh air from outside, while the other expels used air, maintaining optimal air quality and comfort.

Each fan is equipped with a **high-efficiency HEPA filter** to capture airborne particles, helping to create a healthier, more breathable workspace. Thoughtfully engineered for quiet performance, this system keeps the air fresh so users stay focused.

**184 air changes per hour**

# Beautifully Built, Brilliantly Silent.

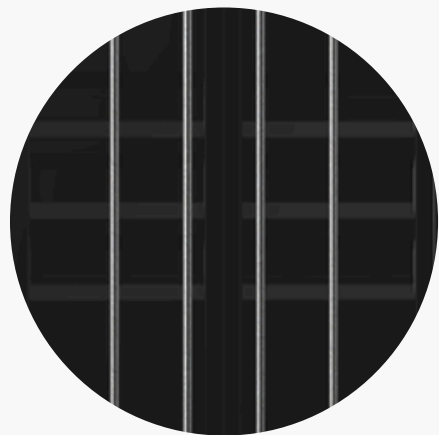

The Container Booth contains a meticulously **engineered acoustic system** designed to deliver a calm, focused environment. Each internal wall features a layered construction of solid panels, high-performance acoustic foam, and fabric with sound-enhancing properties, all working together to reduce noise and elevate comfort.

A magnetic door seal ensures a tight closure, while the double-glazed glass front and rubber gasket floor seal further enhance sound control, minimising external disruptions. The result is a premium acoustic experience that supports conversation, concentration, and creativity.

A close-up photograph of various interior design materials laid out on a light-colored wooden surface. In the foreground, there are several rectangular samples of textured fabric or carpet in shades of grey and beige. Behind them, a color palette with numerous small color swatches is visible, along with a stack of similar color swatch books. To the right, a portion of a dark-colored laptop is seen. The overall scene suggests a professional design consultation or a material selection process.

**Designed By Us.  
Finished By You.**

# Make It Yours In Any Colour.

For those looking to make a statement, the Container Booth offers complete exterior personalisation. The signature end panels that have been designed to echo the iconic doors of a shipping container can be **finished in any RAL colour** as an optional upgrade.

This flexibility allows you to align the booth with brand colours, create a standout accent within your workspace, or bring a subtle architectural tone to the aesthetic. With limitless colour possibilities, the Container Booth becomes not just a functional space, but a bold expression of identity.

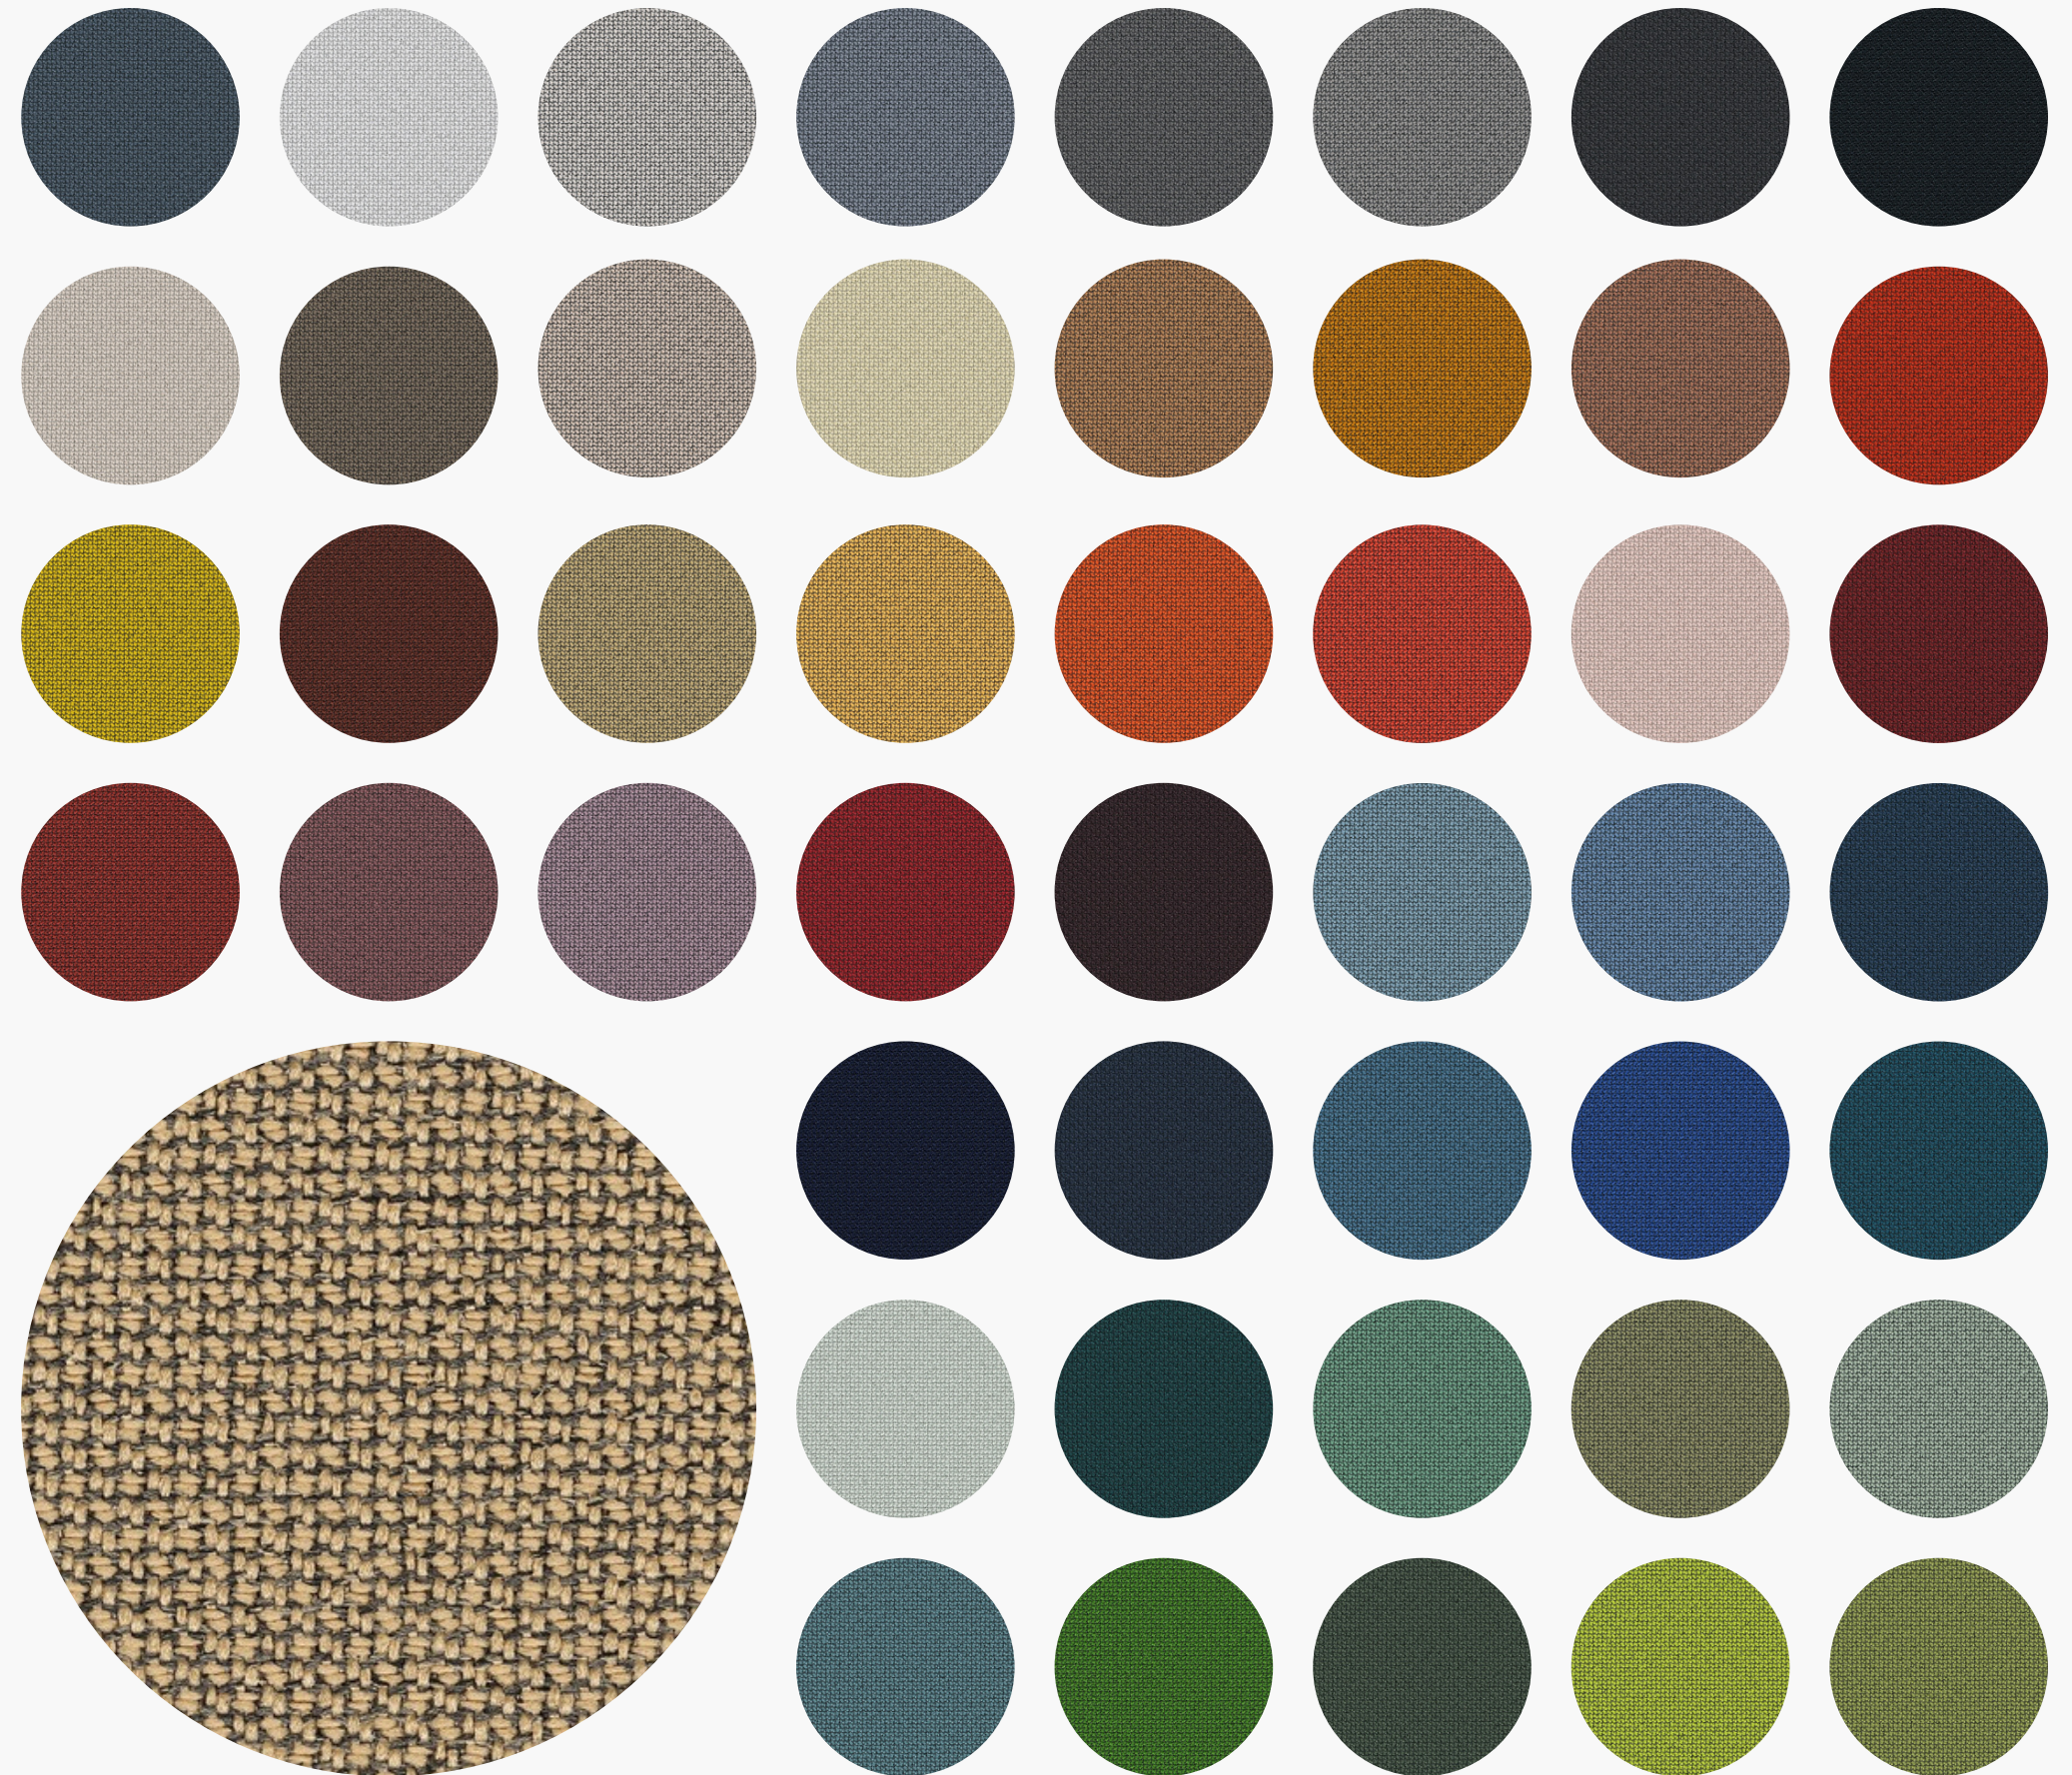

# Your Space. Your Style.

Add a bold personal touch to your Container Booth with high-quality upholstered fabric panels from the Gabriel 'Cura' range. Available for both interior applications, this **customisation option** lets you introduce colour, texture, and personality to your workspace.

**With 50 colour options to choose from**, you're sure to find the perfect match to reflect your brand identity or complement your office aesthetic. A simple upgrade that speaks volumes.

Made from 100% post-consumer recycled polyester. It fuses modern performance with a warm, casual aesthetics and a soft, voluminous touch. The fabric's matt, slightly heathered and natural-looking texture imitates the aesthetics of natural fibres, adding feel-good factor and a touch of classic luxury to any type of furniture.

# Power. Connectivity. Capability.

For teams that need more from their workspace, the **Tech Pack** elevates the Container Booth into a fully equipped collaboration hub. This upgrade includes a **screen hanging bracket suitable for displays from 23” to 42”**, allowing for presentations, video calls, and shared digital work with ease.

To support seamless connectivity, the Tech Pack adds an **additional power socket** at screen height, along with a **Cat 6 ethernet port** and **HDMI interface**. Ensuring reliable performance for both wired and wireless setups.

Designed to integrate discreetly within the booth’s architecture, the Tech Pack enhances functionality without compromising the refined aesthetic of the booth. It’s intelligent technology, beautifully built in.

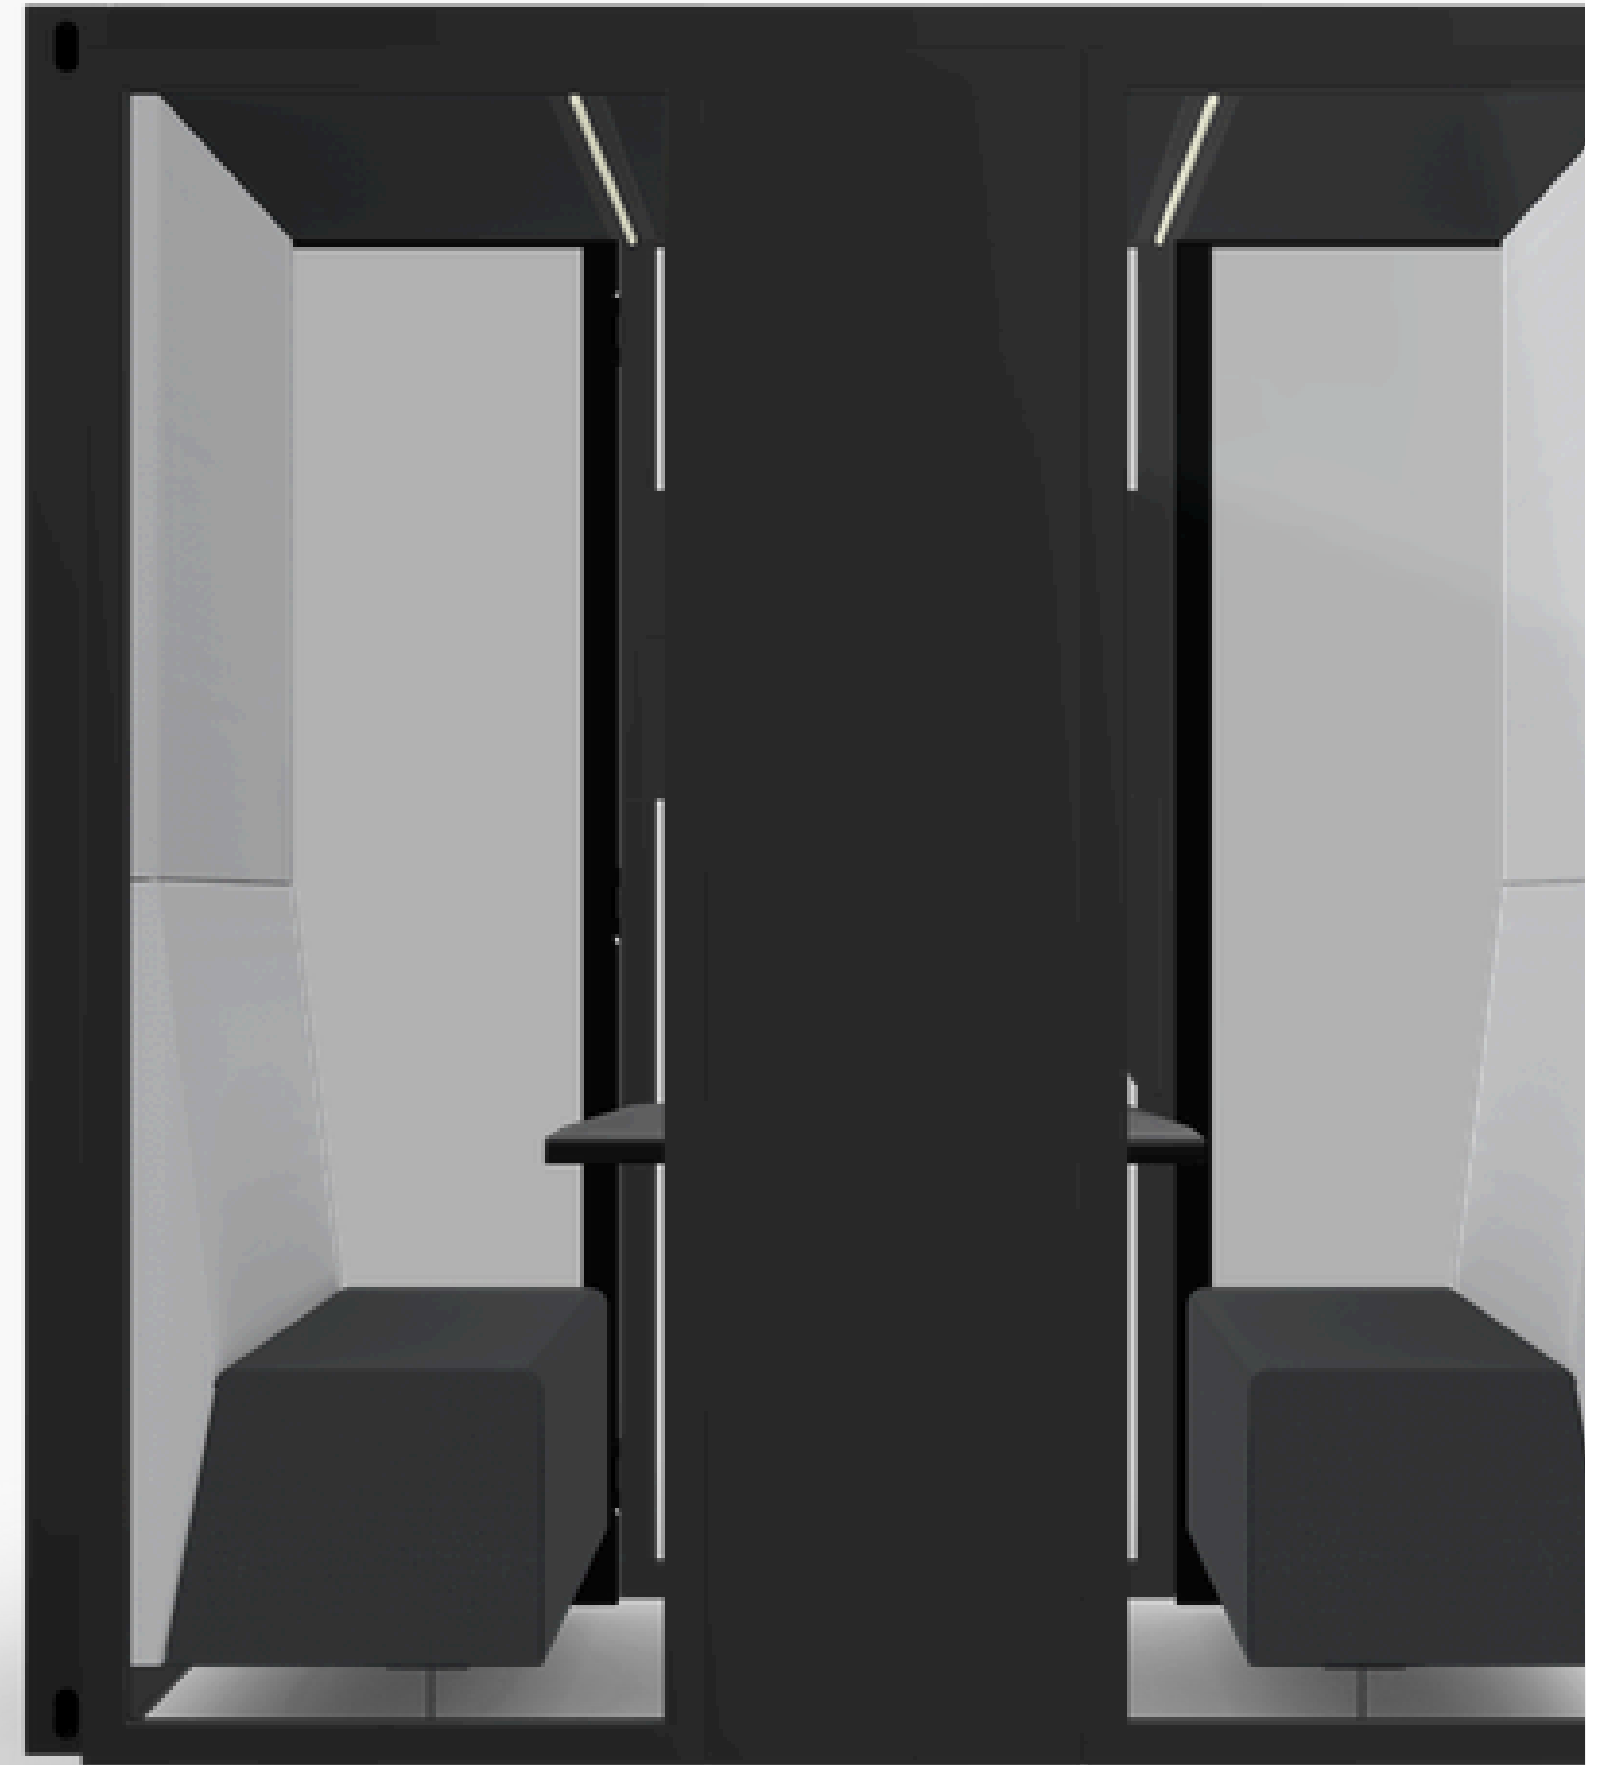

# Transparency Meets Tranquillity.

Enhance the sense of light and openness in your workspace by upgrading your Container Booth with a sleek **double-glazed glass back panel**.

This stylish feature allows natural light to flow through, creating a more open and inviting environment without compromising privacy or acoustic performance.

Ideal for modern offices looking to maintain visual continuity while adding a touch of architectural elegance. It's a simple upgrade that makes a big impact.

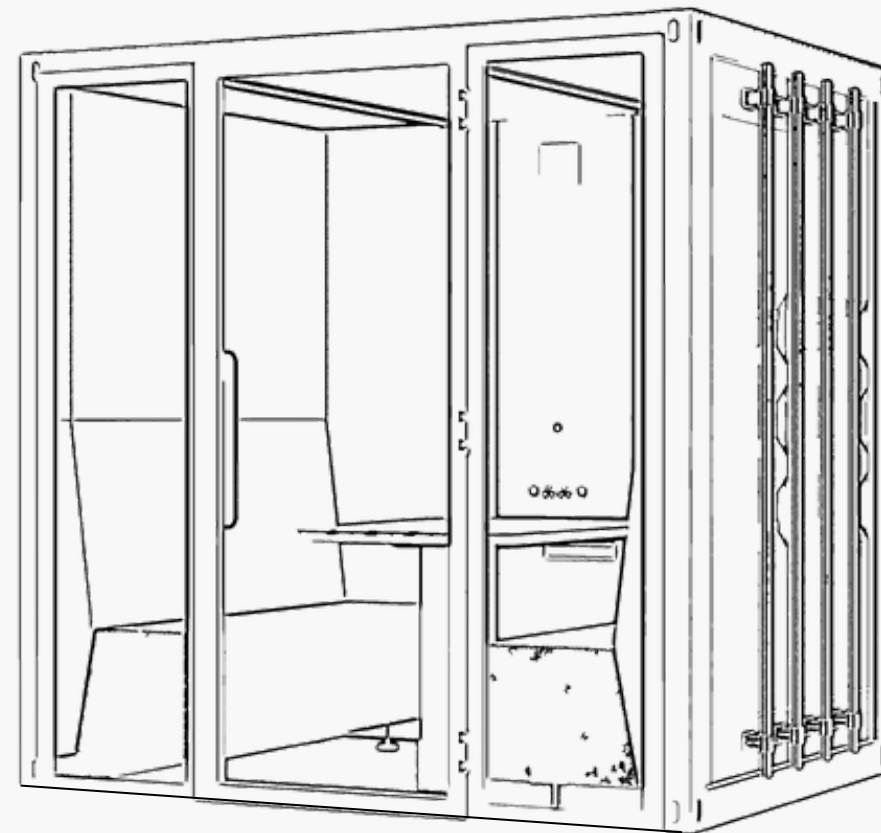

# Limit Distraction. Enhance Privacy.

Enhance both privacy and design with our **optional glass manifestation**. Available as a **full or half-height application** on the glass door & rear glass panel (if applicable), this subtle yet effective detail provides visual privacy while maintaining a sleek, modern aesthetic.

Whether used for branding, wayfinding, or simply adding a refined touch, the manifestation transforms your Work Booth into a more tailored, professional space without compromising light or openness.
