

Escape Pod

Escape is just a pod away

Where Meetings Escape The Noise.

The Escape Pod is an indoor office meeting pod designed to create calm, focused space within busy workplaces. Defined by its striking spherical form and finished in a high-gloss composite shell, Escape is both a functional meeting environment and a sculptural design statement.

Available in 4, 5, 6, or 7 person configurations, the pod's interior is fully lined with high-performance acoustic foam to minimise external noise. Integrated faux leather seating provides comfort for extended meetings, while mains power, ambient lighting, and a removable desk ensure the space is fully equipped for modern collaboration.

Escape is a place to step away from distraction without leaving the office.

A Perfect Fit, Every Time.

Available in **4, 5, 6 and 7 person configurations**, our Escape pods are designed to match the scale of your meetings. Whether it's a small discussion, a productive huddle or a full team briefing, each size offers the same exceptional comfort, privacy and style.

Power, Perfectly Integrated.

Every Escape Pod is designed to support modern working, with power and lighting seamlessly integrated into the space. Each pod is supplied with two Pixel units from OE Electrics, providing convenient access to a **UK 3-pin socket, USB, and USB-C charging**, ideal for laptops, phones, and meeting technology.

Manufactured to the highest standards, OE Electrics Pixel units are backed by a 10-year warranty, ensuring long-term reliability and peace of mind.

To enhance efficiency and reduce energy use, the Escape Pod also features **PIR-activated LED lighting**, automatically illuminating the interior when the pod is in use and switching off when vacant.

Thoughtfully engineered power, without compromise.

Integrated Comfort, Seamless Design.

Seating within the Escape Pod is thoughtfully integrated into the structure of the pod itself. The sculpted shell design incorporates the seating directly into the frame, creating a seamless interior with no loose components and no wasted space.

Each seat is upholstered in durable **faux leather** and cushioned with **3" recycled foam**, providing comfort and support for extended meetings while reinforcing the pod's sustainable credentials. The result is a clean, cohesive interior where design, comfort, and practicality are perfectly aligned.

A Table That Moves With The Meeting.

The Escape Pod table is designed to adapt to the way meetings work. The tabletop is manufactured from crisp **white Egger**, providing a durable, high-quality surface that complements the pod's interior.

Mounted on discreet **castor legs**, the table can be easily repositioned or removed entirely, allowing the space to be reconfigured for different meeting styles. From collaborative sessions to more open discussions. Practical, flexible, and intentionally simple, the table supports the meeting without ever dominating it.

A Softer Space For Clearer Conversation.

The interior of the Escape Pod is **fully lined with egg-box acoustic foam**, carefully selected to enhance both comfort and sound control. The sculpted foam surface absorbs ambient noise and reduces reverberation, creating a calmer environment for focused discussion.

Beyond its acoustic performance, the foam lining softens the pod's interior, contributing to a comfortable, enclosed feel that supports longer meetings and clearer communication. An essential balance of form, function, and wellbeing.

Table Finishes

A close-up photograph of various interior design materials laid out on a light-colored wooden table. In the foreground, there is a large, rectangular piece of grey, textured fabric or carpet. To its right, a piece of light-colored, woven fabric is visible. In the background, there are several color swatch cards and a stack of similar cards. A dark, textured object, possibly a cushion or rug sample, is also visible. The scene is well-lit, with soft shadows.

**Designed By Us.
Finished By You.**

Make It Yours In Any Colour.

For those looking to make a statement, the Escape Pod offers complete exterior personalisation. The signature spherical shells **can be finished in any RAL colour as an optional upgrade.**

This flexibility allows you to align the Escape with brand colours, create a standout accent within your workspace, or bring a subtle architectural tone to the aesthetic. With limitless colour possibilities, the Escape becomes not just a functional space, but a bold expression of identity.

Silence, Personalised.

As an optional upgrade, the Escape Pod acoustic **foam liners can be sprayed and finished in any RAL colour**, allowing the interior to be tailored to your brand, workspace, or design scheme.

This custom finish maintains the foam's acoustic performance while adding a strong visual identity. Whether you choose to blend seamlessly into your environment or make a bold design statement. The result is a pod that performs acoustically and expresses character through colour.

Your Space. Your Style.

Add a bold personal touch to your Escape Pod by changing from the standard faux leather to any fabric from the Gabriel 'Cura' range. This **customisation option** lets you introduce colour, texture, and personality to your workspace.

With **50 colour options** to choose from, you're sure to find the perfect match to reflect your brand identity or complement your office aesthetic. A simple upgrade that speaks volumes.

Made from 100% post-consumer recycled polyester. It fuses modern performance with a warm, casual aesthetics and a soft, voluminous touch. The fabric's matt, slightly heathered and natural-looking texture imitates the aesthetics of natural fibres, adding feel-good factor and a touch of classic luxury to any type of furniture.

4 Person Escape

L1250mm x W2500mm x H2100mm
